BELAL WAHEED

JUNIOR FRONT-END DEVELOPER | REACT & NEXT.JS

Cairo, Egypt | +20 1111004353 | belalwaheed000@gmail.com

Portfolio: belal.is-a.dev | GitHub: github.com/belal-waheed | LinkedIn: linkedin.com/in/belal-whaeed

PROFESSIONAL SUMMARY

Front-End Developer with strong hands-on experience building production-grade web applications using React 19, Next.js, and TypeScript. Experienced in translating complex UI/UX designs into fluid, mobile-first responsive interfaces, integrating asynchronous RESTful APIs with resilient error handling, and implementing custom hooks with scalable client state management. Proficient in modern frontend workflows utilizing Git, pull requests, code reviews, and Jira.

TECHNICAL SKILLS

Core & Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend Frameworks: React.js (React 18/19), Next.js (App Router), Vite
State & Data Handling: Redux Toolkit, React Context, Custom Hooks, REST API Integration, Axios, Fetch API
Styling & UI Systems: Tailwind CSS (v3/v4), CSS Modules, Flexbox, CSS Grid, Responsive Web Design, Lucide Icons
Architecture & Standards: Mobile-First Layouts, Bi-directional Localization (LTR / RTL), PWA, Web Vitals Optimization
Tools, Version Control & Agile: Git, GitHub (Feature Branches & PRs), Jira, Postman, Figma, Vercel

FEATURED PROJECTS

Markbel — Offline-First Media Archiver & PWA | Edge Store Add-on • GitHub

Tech Stack: React 19, TypeScript, Tailwind CSS v4, Dexie.js (IndexedDB), Vite, Edge Extensions

- Built a high-performance bookmark manager with React 19 and TypeScript, supporting guest local vaults and delta sync.
- Engineered a responsive dual-view interface (grid and compact list) maintaining 60fps across mobile and desktop.
- Authored browser extensions published on Microsoft Edge Add-ons store and integrated PWA Web Share Target.

LOOP — AI Customer Feedback & Intelligence Dashboard | Live App • GitHub

Tech Stack: Next.js (App Router), TypeScript, React, Tailwind CSS, Lucide Icons

- Developed a modern customer analytics dashboard using Next.js App Router and TypeScript, combining Server and Client Components.
- Built interactive data visualization widgets, sentiment distribution indicators, and dynamic feedback filtering.
- Integrated asynchronous REST API endpoints with skeleton loading states, empty fallbacks, and error boundary protections.

Tivaq — Luxury Fragrance E-Commerce & Authenticity Suite | Live Platform • GitHub

Tech Stack: React 19, TypeScript, Tailwind CSS, Redux Toolkit, i18next

- Delivered a commercial luxury storefront and admin portal with full bilingual support (English LTR and Arabic RTL) with zero layout shifts.
- Implemented real-time product authenticity verification utilizing camera QR scanning and sub-25ms REST API validation lookups.
- Structured centralized client state with Redux Toolkit and localStorage synchronization for resilient cart persistence.

Moviq — Cinematic Media Discovery Platform | Live App • GitHub

Tech Stack: React, Redux Toolkit, TMDB REST API, Tailwind CSS

- Architected a responsive media discovery web application consuming TMDB REST APIs with paginated feeds and debounced search.
- Normalized Redux entity caching to cut redundant API queries by 85%, and built keyboard-accessible trailer modals.
- Collaborated in a team Git workflow utilizing feature branches, pull requests, and peer code reviews.

EXPERIENCE

Front-End Developer | Independent & Client Projects — *August 2024 – Present*

- Built and shipped multiple production web applications from initial Figma designs to live deployment on Vercel and Cloudflare.
- Integrated third-party and custom RESTful APIs, managing request cancellation (AbortController), auth tokens, and network fallbacks.
- Practiced strict modular component structures, custom hooks, Jira sprint tracking, and Git conventional commit standards.

EDUCATION

Bachelor of Information Technology — *Sinai University, Egypt (GPA: 3.3 / 4.0)* — *September 2023 – Present*

Relevant Coursework: Web Engineering, Data Structures & Algorithms, Database Systems, Software Engineering
